I can find the difference between measurements on two different scales
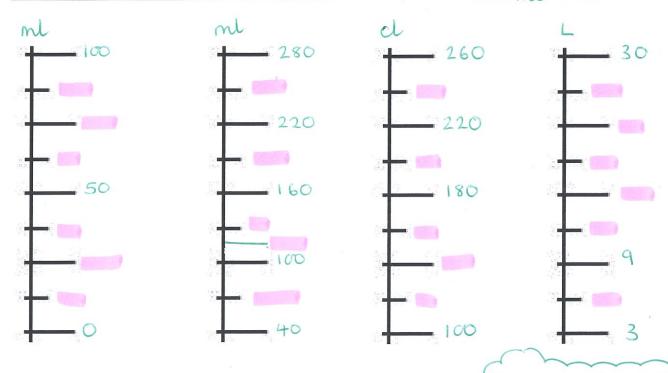

Part 1 – Write in the correct measure

ml
- 100
-
-
- 50
-
-
- 0

ml
- 280
-
- 220
-
- 160
-
- 100
-
- 40

cl
- 260
-
- 220
-
- 180
-
-
-
- 100

L
- 30
-
-
-
-
-
- 9
-
- 3

Can you convert each answer to Litres, centiliters and mililitres?

Part 2 – Solve the differences by converting first

1. Pupil a has 200ml of water in a cup. Pupil b has 230ml of water.
   What's the difference between how much water pupil a and b have?

2. Pupil a has 300ml of squash in a cup. Pupil b has 0.4L of squash.
   What's the difference between how much squash pupil a and b have?

3. Pupil a has 125ml of apple in a cup. Pupil b has 0.15L of apple.
   What's the difference between how much apple pupil a and b have?

4. Pupil a has 950ml of hot choccy in a jug. Pupil b has 1.1L of hot choccy.
   What's the difference between how much hot choccy pupil a and b have?

5. Pupil a has 2 ¼ L of milk in a jug. Pupil b has 2050ml of milk.
   What's the difference between how much milk pupil a and b have?
