

I can find the difference between measurements on two different scales

• Part 1 - Convert between these units of measure

g	kg
1000	1
2000	2
7000	7
1500	1.5
1600	1.6
2600	2.6
3750	3.75
3050	3.05
500	0.5
700	0.7

kg	Tonne
1000	1
3000	3
5000	5
10000	10
2500	2.5
3600	3.6
8500	8.5
8100	8.1
8010	8.01
8001	8.001

Part 2 - Write in the correct measure

$$\begin{array}{r} 4 \div 5 \\ \hline 5 \overline{)4.0} \\ 0.8 \end{array}$$

$$17.6$$
