Play the Teddy Numbers Game

See today's post for a link to click on and the game should load online.

Numbers to 10

Do you remember, in the Castles episode, the Numberblocks were trapped inside but they noticed a hole in the ceiling that went up and out of the castle?

They needed a very big number to help them. Who did they need?

10! That's right! Numberblock 3 knew that Numberblock 10 would be big enough and tall enough to rocket up and out through the hole! They worked as a team to make 10?

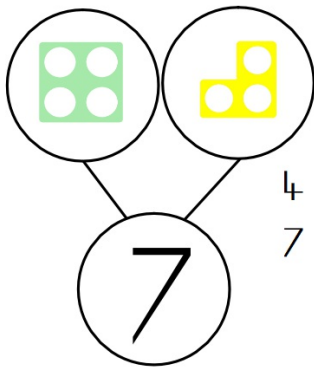

Can you make the numbers 5, 6, 7, 8, 9 and 10 using a part, part, whole model?

Can you make the numbers work in teams to build other numbers? Try putting 3 sets together. Practise saying the special stem sentences to match your part part whole?

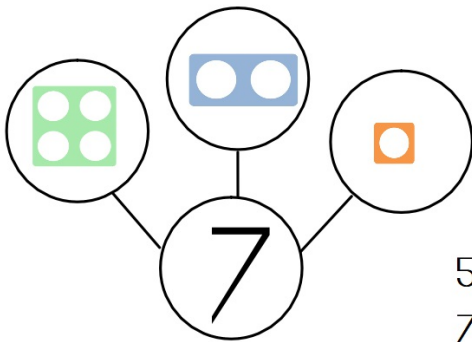

See next page for examples

Wednesday

4 and 3 make 7

7 is the whole, 4 is one part and 3 is the other part.

5 and 1 and 1 make 7

7 is the whole, 4, 2 and 1 are the parts.
