Can you count in 2s, 5s and 10s?

Add different numbers to make these correct.

$$\square + \square = 26$$

$$\square + \square = 26$$

$$\square + \square = 26$$

I can tell the time

Shape 				
I can name some common 2D and 3D shapes from a group of shapes or from pictures of the shapes and describe some of their properties (e.g. triangles, rectangles, squares, circles, cuboids, cubes, pyramids and spheres).				
I can name and describe properties of 2D and 3D shapes, including number of sides, vertices, edges, faces and lines of symmetry.				
I can describe similarities and differences of 2D and 3D shape, using their properties (e.g. that two different 2D shapes both have only one line of symmetry; that a cube and a cuboid have the same number of edges, faces and vertices, but different dimensions).				
Fractions 				
I can identify $\frac{1}{4}$, $\frac{1}{3}$, $\frac{1}{2}$, $\frac{2}{4}$, $\frac{3}{4}$, of a number or shape, and know that all parts must be equal parts of the whole.				
Time 				
I can read the time on a clock to the nearest 15 minutes.				
I can read the time on a clock to the nearest 5 minutes.
