5

Have a look at the groups of cubes. Which is smallest? How do you know? Which is biggest? Can you put them in order from smallest to biggest?

Have a look at these tens frames. Which is smallest? How do you know? Which is biggest? Can you put them in order from smallest to biggest?

18

5

32

Have a look at these objects. Which is smallest?
How do you know? Which is biggest? Can you put
them in order from smallest to biggest?

Now it's your turn!

Can you find three sets of objects and put them in order? You could use toy cars, pens, pencils, buttons, pasta pieces, books, keys, hair bands, straws, lego bricks, cuddly toys...

Make sure your groups aren't bigger than 50!

For an extra challenge you could print the number cards, pick 3 and put them in order. Or you could write 3 numbers and you could order those!
