

What is the difference between these
two things?

What do we mean by alive?
What do we mean by not alive?

We know things are alive if they can:

*Grow
Eat
Move
Breathe
Have babies
Go to the toilet*

↓ *Have a look at these things. How do you know they are alive?*

*If things can't do all of these things,
we know they are not alive.*

*Grow
Eat
Move
Breathe
Have babies
Go to the toilet*

↓ *Have a look at these things. How do you know they are not alive?*

Have a look at these things.
Which ones are alive? Which ones are not alive?
How do you know?

Have a chat about each of the things you decided are alive. Can they do all of the things necessary to be alive?

Grow

Eat

Move

Breathe

Have babies

Go to the toilet
