

I can count in multiples of 2, 5 and 10 by making arrays.

Group these objects in arrays into 2's, 5's or 10's and write the repeated addition number sentence:

| | |
|---|--|
|  | |
|  | |
|  | |

Match the arrays to the repeated addition.

| |
|---|
|  |
|  |
|  |
|  |

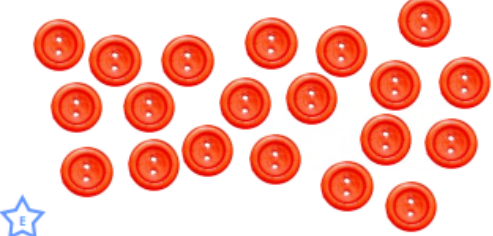

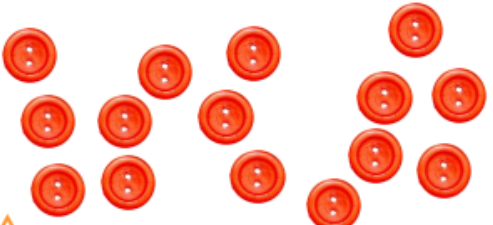

$$2+2+2+2+2+2=12$$

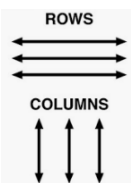

$$5+5+5+5=20$$

$$2+2+2+2+2=10$$

$$5+5+5=15$$

Draw the array to represent the number sentence. Use the buttons to help you - remember to group them first.

| | |
|--|--|
| <p>4b. Use the buttons to make an array representing $2 + 2 + 2 = 6$.</p>  | |
| <p>8b. Use the buttons to make an array representing $10 + 10 = 20$.</p>  | |
| <p>12a. Use the buttons to make an array representing $5 + 5 + 5 = 15$.</p>  | |

Draw the array. Challenge: Can you write down the repeated addition number sentence?

There are 2 rows of balls.

Each row has 5 balls in it.

There are 5 rows of balls.

Each row has 2 balls in it.
