

Checking and Estimating

1. Dawn does the sum $341 + 126 = 467$ in a maths lesson.

What inverse calculation could she use to check her answer? Tick the box.

$467 + 126 = 341$

$341 - 126 = 467$

$467 - 126 = 341$

2. $360 \div 120 = 3$.

Circle the multiplication below that correctly uses the same numbers.

$360 \times 120 = 3$

$120 \times 3 = 360$

$360 \times 3 = 120$

3. Draw a line to join each calculation to its inverse. One has been done for you.

$15 + 3 = 18$ — $45 + 3 = 15$

$15 + 3 = 5$ — $18 - 3 = 15$

$15 \times 3 = 45$ — $18 + 3 = 21$

$21 - 3 = 18$ — $5 \times 3 = 15$

Use a ruler.

4. Here are some multiplications.

For each multiplication, write a division that uses the same numbers.

$49 \times 3 = 147$

$147 \div 3 = 49$

OR $147 \div 49 = 3$

$286 \times 19 = 5434$

$5434 \div 19 = 286$

OR $5434 \div 286 = 19$
