

Maths Focus: mathematical and logical thinking; mental and written multiplication; place value; multiplying fractions

Helpful Hints: Firstly work out how many routes there are through the maze; once you know that, try out each route and see what your finish number is. Use written methods to multiply numbers you can't work out mentally.

Level 1	Level 2	Level 3
<p>Jude has a special 'Multiplication Maze' where there are lots of different routes to get to the finish square.</p> <p>1. Which route gives Jude the highest total?</p>	<p>Jude has a special 'Multiplication Maze' where there are lots of different routes to get to the finish square.</p> <p>1. Which route gives Jude the highest total? 2. Which route gives Jude the lowest total?</p>	<p>Jude has a special 'Multiplication Maze' where there are lots of different routes to get to the finish square.</p> <p>1. Which route gives Jude the highest total? 2. Which route gives Jude the lowest total? 3. Which route gives Jude the total of 200?</p>
