

Year 2

Our Amazing World Knowledge Organiser

How can we look

Tanzania

- Tanzania is the largest country in east Africa
- About 90 percent of Tanzanians live in rural areas and live off what they can grow on the land.
- There are about 120 African tribal groups in Tanzania.
- Serengeti National Park is Tanzania's oldest and most popular park for tourists

The Mud House Children's Charity

- Our learning about Tanzania will be linked with our new school charity: The Mud House Children's Charity
- Children in Year 2 will have a visit from one of the charity members and will be involved in our school launch of the charity.
- We will also be considering fundraising activities that we can do to support this important charity.
- If you want to learn more about the charity, and the Maasai communities it supports, you can visit: <https://www.mudhousechildren.com/>

Geography	
landscape	All the visible features of an area of land
equator	A line drawn on the earth equidistant from the poles, dividing the earth into northern and southern hemispheres .
continent	Any of the world's continuous expanses of land: e.g. Europe, Africa
oceans	A body of salt water that covers approximately 70.8% of the surface of Earth and contains 97% of Earth's water i.e. Arctic, Southern, Indian, Atlantic and Pacific.

Key Vocabulary	
germination	When the conditions are right, the seed soaks up water and swells, and the tiny new plant bursts out of its shell. This is called germination .
sprout	When a plant sprouts , it grows new shoots .
shoot	A shoot grows upwards from the seed or plant to find sunlight .
seed dispersal	Seed dispersal is when the seeds move away from the parent plant. They can be moved by the wind or animals.
What do plants need to grow well?	
sunlight	All plants need light from the sun to grow well. Some plants need lots of sunlight . Some plants only need a little sunlight .
water	All plants need water to grow. Without water , seeds and bulbs will not germinate .
temperature	Temperature is how warm or cold something or somewhere is. Some plants like cooler temperatures and some like warmer temperatures .
nutrition	Food or nourishment. Plants make their own food in their leaves using sunlight .
