offspring	Offspring are the young of a plant or animal.
reproduce	This means to produce another living thing of the same kind.

Life Cycles
 A life cycle is the journey of a living thing from beginning to end. All young animals change as they go through the different stages of their life cycle and grow into adults.

Some **offspring** look like their **adult** when they are born.

Some **offspring** do not look like their **adult** when they are born.

Some animals give birth to **live young**.

Some animals lay eggs which the **young** hatch from.

Both of these types of **young** then **develop** into **adults**.
